

Internships

Staff interested in being a superintendent or principal intern must be enrolled in a university superintendent's or principal's program of study.

The prospective intern should request an internship opportunity from the superintendent or principal with whom the internship would occur. The superintendent and appropriate principal will interview the candidate and decide if the internship shall be allowed.

Following selection, the intern and his/her supervisor will set objectives and plan appropriate activities dealing with such areas as: personnel, curriculum, community relations, student relationships, finance, non-instructional operations and facilities.
